EAT CIRCULAR

EAT CIRCULAR Project

Eat Circular is a project sponsored by the EIT Climate-KIC that seeks to promote education and tools to manage resource flows in the “Circular Food Chain”.

This project aims to develop training sessions in Italy, Portugal, Slovenia and Spain, to promote best practices in reducing food waste in collective food companies (e.g. canteens).

Eat Circular started in November 2019 and has the goal of training public and private officers on strategies to reduce our “food footprint”.

The active engagement of public and private stakeholders is essential to prevent food waste and increase our sustainability

Group Activity – Miro Platform

- Each group must enter the Miro link and proceed to the challenge with the same name as their breakout room.
- Each group should discuss ideas in their break room and place that information on Miro
- Participants must elect a spokesperson to present the final group solution
